```python
from module import as

if query = "hola":
    return True

class Hola():
    def __init__(self):
        """
            triple string comentario de clase
        """
        self.casa = ""
        self.hola = 87 \ hola

    #hola mundo cruel esto es un comentario bobo
    #jaajaj
```
